

Run your entire school **on your own terms.**

EduAnant installs on a PC or server inside your school and runs over your own Wi-Fi. Admissions, multi-head fees, attendance, exams, library and transport in one system — with self-service portals for teachers and parents, and a native Android app. No broadband dependency. No monthly cloud bill. Your records never leave your campus.

- Transport, Routes & Fare Slabs
- Notice Board & Push Notifications

Human Capital & Resources

- Human Resources & Staff Leave
- Library Circulation
- Security & 96-key Role Matrix
- Backup, Restore & System Config

Cloud-grade software. Hosted inside your school.

Most school software stops working the second the internet cuts out. EduAnant installs directly on your school's local PC or server, and staff reach it instantly over your own Wi-Fi router — even when the broadband line is down. Student records and financial ledgers never leave campus, so data ownership is never in question. Nightly local backups run automatically.

Runs on school LAN

No monthly cloud bill

Nightly local backups

Hindi + English interface

CBSE / ICSE / State Board

Parent & teacher Android app

Free with every school. Parents get an instant push notification the moment a notice or fee alert is published — no circular lost at the bottom of a school bag.

Push alerts on notices & fee dues

SOUND FAMILIAR?

"Fee disputes at the counter."

A parent arrives with an old receipt insisting last quarter was paid. The clerk spends twenty minutes in a physical ledger while a queue builds.

With EduAnant: search the student's name and the full history — dues, advance adjustments, split cash/UPI entries — is on screen in under 30 seconds. Reprint a branded PDF receipt on the spot.

"Twenty minutes gone in first period."

Roll call on paper registers, late-comers overwriting entries, and a register that has to be totalled by hand at month end.

With EduAnant: one-tap bulk attendance in under a minute on any phone or laptop. If a teacher is on leave, the system prompts for a substitute immediately.

"No record of who came and went."

An illegible paper visitor book, and no reliable trace of which student left early or with whom.

With EduAnant: a dedicated Reception Counter module logs visitors, phone enquiries and digital student gate passes — searchable months later.

PRICING

PLAN	RATE	WHAT IT WORKS OUT TO
Billed annually (recommended)	₹20 / student / month	₹240 per student a year, paid once
Billed monthly	₹25 / student / month	₹300 per student a year

Setup, migration & training	₹0	Included — no implementation fee

Included at zero extra cost

All 16 modules with no tier to upgrade to · both self-service portals · the Android app · unlimited staff accounts · on-site migration from your existing Excel sheets · staff training · every future update.

HOW WE GET YOU LIVE

- 1 On-site survey & install**
We check your existing PC or supply a spec, install EduAnant on your network, and configure your board, session and class structure.
- 2 Data migration from your Excel sheets**
Students, staff, fee heads and opening balances are imported and reconciled against your registers before go-live.
- 3 Role setup & staff training**
We tailor the 96 permission keys per role — principal, cashier, class teacher, front desk — then train each team on their own screens.
- 4 Go live, with support alongside**
We stay reachable through your first fee cycle and first exam cycle — the two moments that matter most.

TALK TO US

Book a walkthrough at your school

We bring a laptop, load your own class structure into it, and show you the exact screens your staff would use. No obligation, no sales pressure.

Founding school offer

The first 25 schools to sign receive **20% off, with renewal rates locked for life** — and a direct line to the engineers who build the software, not a ticket queue.

Your feedback shapes the roadmap. Several features in Release 1.4.0 exist because a partner school asked for them.
